Lucid Botanicals products are developed with all natural ingredients, premium therapeutic grade botanical oils, vitamins and potent antioxidants that support healing for most skin conditions and assists in the repair of damaged and aging skin.

Our products not only refinish skins texture, but also erase sun damage, refine pores, reduce discoloration, smooth signs of aging, and even out skin tone.

Your skin is like anything else, “You have to invest time in it”!

Lucid Botanicals products are designed to naturally produce “healthy” skin, support healing for most skin conditions and assists in the repair of damaged and aging skin.

Most commercial creams and lotions are predominantly water; the moisture is quickly absorbed into dry, wrinkled skin. As the water enters the skin it expands the tissues like filling a water balloon so that wrinkles fade away and the skin feels smoother. But this is only temporary. As soon as the water evaporates or is carried away by the blood stream, the dry, wrinkled skin returns. No matter how hard you try, you will never be able to permanently cure dry or wrinkled skin with any *commercial* lotion.

Why is Botanical oil the only type of oil you should use on your skin? The answer is that it contains many antioxidants that fight free-radicals that cause aging.

What is a free-radical? Simply stated, the skin is made up of molecules; when a molecule loses its electron it becomes unstable, it then tries to steal from nearby molecules. In doing so it creates damage and even destroys nearby cells.

This chain reaction is what causes you to age. In today's market, most products focus on collagen and elastin; these products can NOT stop this chain reaction. Unless you stop the free-radical destruction with **antioxidants**, all the collagen in the world is not going to help.

The Need for Antioxidants:

Our skin is made up of connective tissues. These tissues give our skin strength and elasticity. As we age the fibers are continually subjected to free-radical attacks, which then breaks them down. As a result, connective tissues become hardened and lose both elasticity and strength. The skin loses its ability to hold itself together and begins to sag and become wrinkled. The only way our body has to fight them is with **antioxidants**.

Most conventional skin care products are made with refined vegetable oils which have all the antioxidants stripped from them. If you use a lotion or cream with refined oil in it, you are in fact causing your skin to age faster. The lotion, though it may bring temporary improvement, will actually **accelerate the aging of the skin and even promote skin cancer through the free radicals that are readily formed from the refined vegetable oil.**

When a free-radical comes into contact with an antioxidant, the chain reaction is stopped. For this reason, it is good to have plenty of antioxidants in our cells and tissues to protect us. The number of antioxidants we have in our tissues is determined to a large extent by the nutrients in our diet. It is also extremely important to have antioxidants in our skin care products as well. Lucid Botanicals are especially useful in fighting and destroying free-radicals as it contains plenty of **vitamins and antioxidants!**

The ideal lotion or cream is one that is made from oil that not only softens the skin, but protects it against damage, promotes healing and gives it a more youthful and healthy appearance. Lucid Botanicals Skin Care fits that description. We use the best natural ingredients for skin products, which prevents destructive free-radical formation and provides protection against them.

Lucid Botanicals line helps to keep the skin from developing liver spots, and other blemishes caused by aging and over exposure to sunlight. It helps to keep connective tissues strong and supple so that the skin doesn't sag and wrinkle. Lucid Botanical oil is absorbed into the skin and into the cell structure of the connective tissues, limiting the damage excessive sun exposure can cause and limits free-radical damage.
